

Is Your Car/Truck Harboring the Coronavirus?

Fact: Covid-19 can live on surfaces for up to 9 hours

You May Be Harboring If:

- You feel the need to “constantly” wipe down your vehicle with sanitizer.
- You enter your car **after being in a public** place where you or anything you are putting in your car has been exposed to the virus.
- You **work in a place** where you or anything you are putting in your car has been exposed to the virus.
- You are **carrying passengers** who may have been exposed to the coronavirus.
- You **work in the healthcare industry**.
- You **are a first responder**.
- You **transport people** as part of your job.
- You think sanitizer last longer than a few minutes.

You NO LONGER have to Fear you may be exposing your family members to the Coronavirus through your car!

Give your vehicle a flu shot -- BE Rx Certified Protected for 1 Year!

The Patented **Rx Protect Vehicle Treatment** kills bacteria & 99% of all viruses (including Covid-19) that may be introduced into the interior of your vehicle for **1 full year -- Guaranteed!**
